Pan-European Bioinformatics Training Strategy Workshop
4-5 November 2013

GOBLET Lightning Talk
Terri Attwood
1. **What are the training needs and what are you doing to address these needs?**

- Training needs are multi-faceted – far too many & complex for 1 slide
- GOBLET is working with organisations across the globe to try to harmonise world-wide efforts to address these needs
2. **What can you offer at a Pan-European level that is sustainable?**

- An established network of trainers/organisers & a registry of courses & materials, sustained through commitment to a subscription-based Foundation
3. **What is your vision for a Pan-European, over-arching training strategy?**

- To create a sustainable training network that transcends national, political, cultural & social boundaries
- To harmonise efforts & share our intellectual capital (our tools, resources, materials, trainers), for the benefit of all communities
- To cooperate with & learn from others, both to assimilate & to disseminate good practice

Paper in Briefings in Bioinformatics

Best Practices in Bioinformatics Training for Life Scientists

• Survey on training needs amongst Life Scientists

• for those using bioinformatics tools, to determine the areas & format in which they'd like training

>200 responses
